

Progress Report

Week 18 (01/05/2017 - 05/05/2017)

Week Notes

- Kingsday & Kingsday +1
- Started investigating evaluation techniques for algorithms
 - Had a look at how some of the papers I found are doing it
 - Investigated how these methods may be lacking
 - Investigated TREC evaluation methods
 - Chose a couple of “ineffective” methods for baseline generation

Next Week

- Finalise evaluation pipeline
- Implement 2 baseline methods of change detection
- Investigate other approaches, hunt down a library or some source for these to allow concentrating on evaluation scaffold
